Malaria is a disease which gradually destroys the strong, nourishing elements of the blood. When the malarial poison begins to absorb the rich, red corpuscles of the circulation, we see pale, sallow complexions and a general impairment of health. As the blood becomes weaker the appetite fails, digestion is disturbed, chills and slight fever are frequent, and in aggravated cases boils and eruptions break out on the flesh. Malaria is blood poverty, and the only way to cure the trouble is to enrich and purify the circulation. S.S. S. is especially adapted to the cure of malarial troubles because it contains no harmful minerals, and while ridding the system of the malarial germs, S. S. S. builds up the entire constitution by its fine tonic effects. If you are suffering with Malaria begin the use of S. S. S. and rid yourself of this weakening disease. Book on the blood and any medical advice free. S.S. S. is for sale at drug stores.
